Priority Data (CC No Date): JP 81178173 (811106)

Abstract (Basic): Absorber is claimed which consists of a porous material, liq. state foul smelling gas absorber (the liq. absorber being supported on the porous material) and the porous material is wrapped in film which is gas-permeable but not liq-permeable.

Prior art absorbers wrapped in cloth, or nonwoven cloth are not suitable for home use (esp. refrigerator), as the liq. may leak through the cloth and cause staining. The claimed absorber can be safely used in the home. (3pp)
